

# Threat Management Resources

- DISASTER BEHAVIORAL HEALTH CENTER

The Disaster Behavioral Health Center is focused on research, training, consultation, and the application of behavioral health skills and information in the preparation for, reaction to, and reintegration from any disaster situation.

We are dedicated to advancing and enhancing the best practices in disaster behavioral health for our communities.

The application of disaster behavioral health concepts and principles is crucial for the health and recovery of individuals and the communities affected by a disaster.

## The DBH Center provides

- Support for disaster behavioral health research projects in the realms of theory, preparation, mitigation, response, recovery, reintegration, and resiliency.
- Training resources for communities and disaster behavioral health providers.
- Consultation on disaster effects and response for special needs populations and diverse cultures.
- Sponsorship of regular disaster behavioral health classes throughout the year and an Annual DBH Conference .
- A cadre of disaster behavioral health providers for on site assistance, collaboration, and the development of responses and resources to meet disaster behavioral health needs.
